# 48 metre Palfinger

18 tonne GVW (Operated Only)

AA ACCESS

## 48 m Palfinger features

The unique manoeuvrability of the 48 m Palfinger is all thanks to the additional jib boom. The hydraulically operated X-jib between the upper boom and the workman basket gives the access platform with a 240° movement radius unparalleled abilities when it comes to assuming a precise position high up in the air.

The 48 m Palfinger is ideal for all types of roof work, building's maintenance and facilities management. It's exceptional configuration combined with a gross vehicle weight of 18 tonnes makes it a flexible but solid work-horse.
